Boston, March 12—George S. Boutwell was elected United States Senator to-day in Convention of the two Houses.

The Leading Nation House of Memphis.

The leading nation house of Memphis is the new establishment of Hollowell, Crockett & Haller. This fact should be treasured by our merchants.

They purchase all of their goods from the manufacturers, and in quantities so large that they can successfully compete with any house west of New York and Philadelphia.

In looking through their stock, we were struck by the quality and the taste displayed in its selection, and the peculiar adaptability of their goods for Southern trade.

It is emphatically the finest and most complete stock of notions we have seen. Indeed, the rare novelties displayed, would make a ladies heart beat quicker for hours.

The department of gents' furnishings, goods, and ladies under-wear, we never saw equaled. In white goods we were shown some of the finest and rarest styles and finish of modern fashion, and in almost endless variety.

In short, every thing in the notion line can be found at Hollowell, Crockett & Haller, and at prices as low as any western or southern market.

We cordially commend this firm to our readers as worthy of patronage and confidence in the highest.

Rico, Sisk & Co., of Memphis, are receiving a splendid stock of Spring and Summer Goods and Notions.

We take occasion to call the attention of builders and those who are erecting new buildings, to the fact that, Marcus Jones, of Memphis, keeps the largest stock of wall paper, window shades, etc., in the South West.

His Parlor and drawing-room decorations, and gold and silver wall papers, are beautiful we ever saw. His is the leading house in this line in Memphis, and money can be saved by purchasing of him. We especially recommend him to our readers, as he will give in price, quality and variety, to all who favor him with their trade. See card.

Real Estate.

We call attention, especially of our Mercantile readers, to the card headed "To the Trade of Arkansas, Mississippi and West Tennessee," in this issue of the Whig and Tribune.

It will be seen that the business men of Louisville, in their desire to cultivate intimate business relations with us, and with our friends South and West of us; and to prove their faith by expensive works which speak for themselves.

BUREAU OF AGRICULTURE.—We have received of the Gov. and the preliminary report of the Bureau of Agriculture. The Governor's Message is full of food for thought, and the preliminary report of the commissioners is the best thing of the kind we have read.

Carrriages and Buggies.

The oldest and one of the best and largest Carriage and Buggy manufacturing firms in the West, is the Woodruff & Co. of Memphis. We have advertised for this excellent firm for over twenty years, and we have always found them enterprising, liberal gentlemen.

It affords us real pleasure to commend them to the public good, and in every way worthy of confidence. See card.

Ladies' Attention.

Mrs. M. C. Hunter, of Memphis, invites attention to her new issue. Her emporium of fashion is the center of attraction in the fashionable circles of Memphis, and our ladies will do well to have this fact in mind when they visit or send to Memphis for their wardrobe.

Chickasaw Foundry.—We have frequently had occasion to call at the Chickasaw Foundry, of Memphis, and always with pleasure. It is situated at the corner of Second and Winchester streets. It was started in 1865, immediately after the war.

Since that time, the establishment has gone on, increasing in business and in extent, until now it embraces not only the original corner, but spreads over Nos. 96, 98, 100, 102 and 104 Second street, and still the premises are crowded with work.

Continually rushes on the hands of the proprietors. The establishment comprises all the departments and adjuncts of a first class foundry, embracing a large shop, pattern gallery, where all of the models are kept in systematic order, named and numbered, so that a boy can go and put his hand on anything he wants in half a minute; a foundry department, where all the work is done; a brass foundry; a large machine shop, where lathes are continually going by the force of a great engine located right in the shop. There is also a shop, a core-drying oven, a turning lathe, and a large crane, and a large crane, and a large crane.
